producer of control cables

COMPANY PROFILE

LINEX Sp. z o.o. manufactures flexible control cables, drive cables, pull – push cables, Bowden conduits and casings, flexible shafts and other similar products.

LINEX products comply with current quality standards and meet the individual customer's requirements.

In 1999 Linex received an ISO 9001 Quality Certificate. In 2009 the company developed, implemented, and certified the quality management system in accordance with the requirements of ISO/TS 16949. Award of the certificate means that the company has implemented and maintained a Quality System guaranteeing compliance with customer requirements at a consistently high level, both as to the quality of the product and delivery methods.

LINEX Sp. z o.o. plays a leading role in the spare parts market supply in Poland and Europe. It is a supplier of hand brake, clutch, gas and gear shift cables, as well as door, bonnet and boot opening cables.

LINEX supplies cables directly to car factories and contractors of automotive companies. Since 2009 the company has been consistently and dynamically increasing its production for the OE market.

Apart from automotive industry we also supply our products to medicine industry, welding industry, etc.

producer of control cables

COMPANY PROFILE

The company employs nearly 200 experienced employees and has its own facilities with a total surface area of 7000 m² , including:

- ▶ production hall 1 where processes of zamak and plastic injections, coating, sleeve and tubes extrusion as well as the assembly of finished products take place
- ▶ production hall 2 equipped with specialized machinery and equipment for manufacturing of steel wire ropes, conduits casings, flexible shafts and push-pull type casings
- ▶ machine shop making technological equipment, machinery and equipment of own design, moulds for plastic and zamak, and performing maintenance-related tasks. The machine shop is equipped with modern complete CNC tooling.
- ▶ warehouse supported by an integrated IT system and separate storage sectors
- ▶ construction and technology department - with research facilities
- ▶ laboratory equipped with 3D CNC measuring machine, microscope, CNC testing machine and equipment for fatigue testing.

producer of control cables

HISTORY

LINEX Production & Trade Enterprise was established by Stanisław Kasprzycki in 1963. He started manufacturing semi finished products for the production of automotive cables.

Steel rope was the first product and then the production of Bowden conduit and flexible shaft was started. All the products were manufactured by the machines constructed by the owner of the company.

In 1981 Stanisław Kasprzycki conveyed the workshop to his son Wojciech Kasprzycki. In 1983 the new owner made a decision to start up the production of complete automotive cables and this production has been a basic sphere of activity of Linex Company till now.

In 1990, when the political thaw began, the rapid growth of the company started. It was essential to enlarge the production site. That's why in 1993 the company relocated to the new premises at Rejtana street, where the company has been situated until now. Also then the company was given a name "LINEX".

Since 1999, LINEX has had a quality management system consistent with ISO 9001:2000.

In 1999, the company started cooperation with FAURECIA - a group manufacturing sub-assemblies for automotive factories. It is supplied with cables to be mounted on PEUGEOT, VW, SKODA SEAT and AUDI cars.

In 1999 LINEX acquired Quality Certificate consistent with ISO 9001 standard.
Certification was performed by TUV Cert.

producer of control cables

HISTORY

In 2002 „Linex” company started to cooperate with INTIER AUTOMOTIVE CLOSURES POLAND, MYSŁOWICE – producer of parts for automotive industry.

The year 2003 is another important date in Linex’s history. The premises were renovated and the new offices were built. The company gained the new look.

The next important step in the company’s development was made by starting the cooperation with medical companies in 2004. Linex began to produce the components to hospital beds.

In 2006 the assortment of Linex’s products was extended again. On the basis of cooperation with company ENSTO Linex commenced production of ropes used in electrical industry.

In 2007 Linex invested in a new warehouse-workshop building. Now the company has the floor area of 4 420 square meters (2 500 m² of production area included) and 7 765 m² of the site. It was also a year of great investments in machines. The company bought two extrusion machines and this purchase allowed to start up with the production of plastic tubes and hoses. The company also started to produce push-pull casings.

The year 2007 was a period of a lot of investments. The company purchased three modern extrusion moulding lines for plastic tubes and jackets. This year, the company has purchased a complete line for the production of push - pull housings. These housings are supplied to Magna Closures in Mysłowice.

In January 2009, Linex was awarded a certified quality management system consistent with ISO/TS 16949.

In 2010, additional space of 2500 m² was leased for a production hall. Since 2010 a number of new projects have been implemented for new cars such as: Audi, Mercedes, VW, Volvo, Fiat, Lancia and Alfa Romeo.

producer of control cables

HISTORY

In 2012 the company implemented an investment project aimed at machinery park modernization with a number of machines in CNC technology and extension of the product offer with the production of injection moulds

A year later, Linex changed its legal status from the company to a limited liability company.

In 2014 during a solemn ball commemorating the 50th anniversary of Linex, employees received service anniversary rewards and distinctions. It provided a great opportunity to meet all those who have supported, advised and contributed to creation of the company's history.

In 2018 LINEX received the positive assessment from certification audit. The certificate confirms the compliance of the company's Quality Management System with PN-EN ISO 9001:2015 and IATF 16949:2016 requirements for the automotive industry.

Since 2018, up to present, Linex has been expanding its machine park with new plastic injection molding and zamak injection machines co-financed with the EU funds.

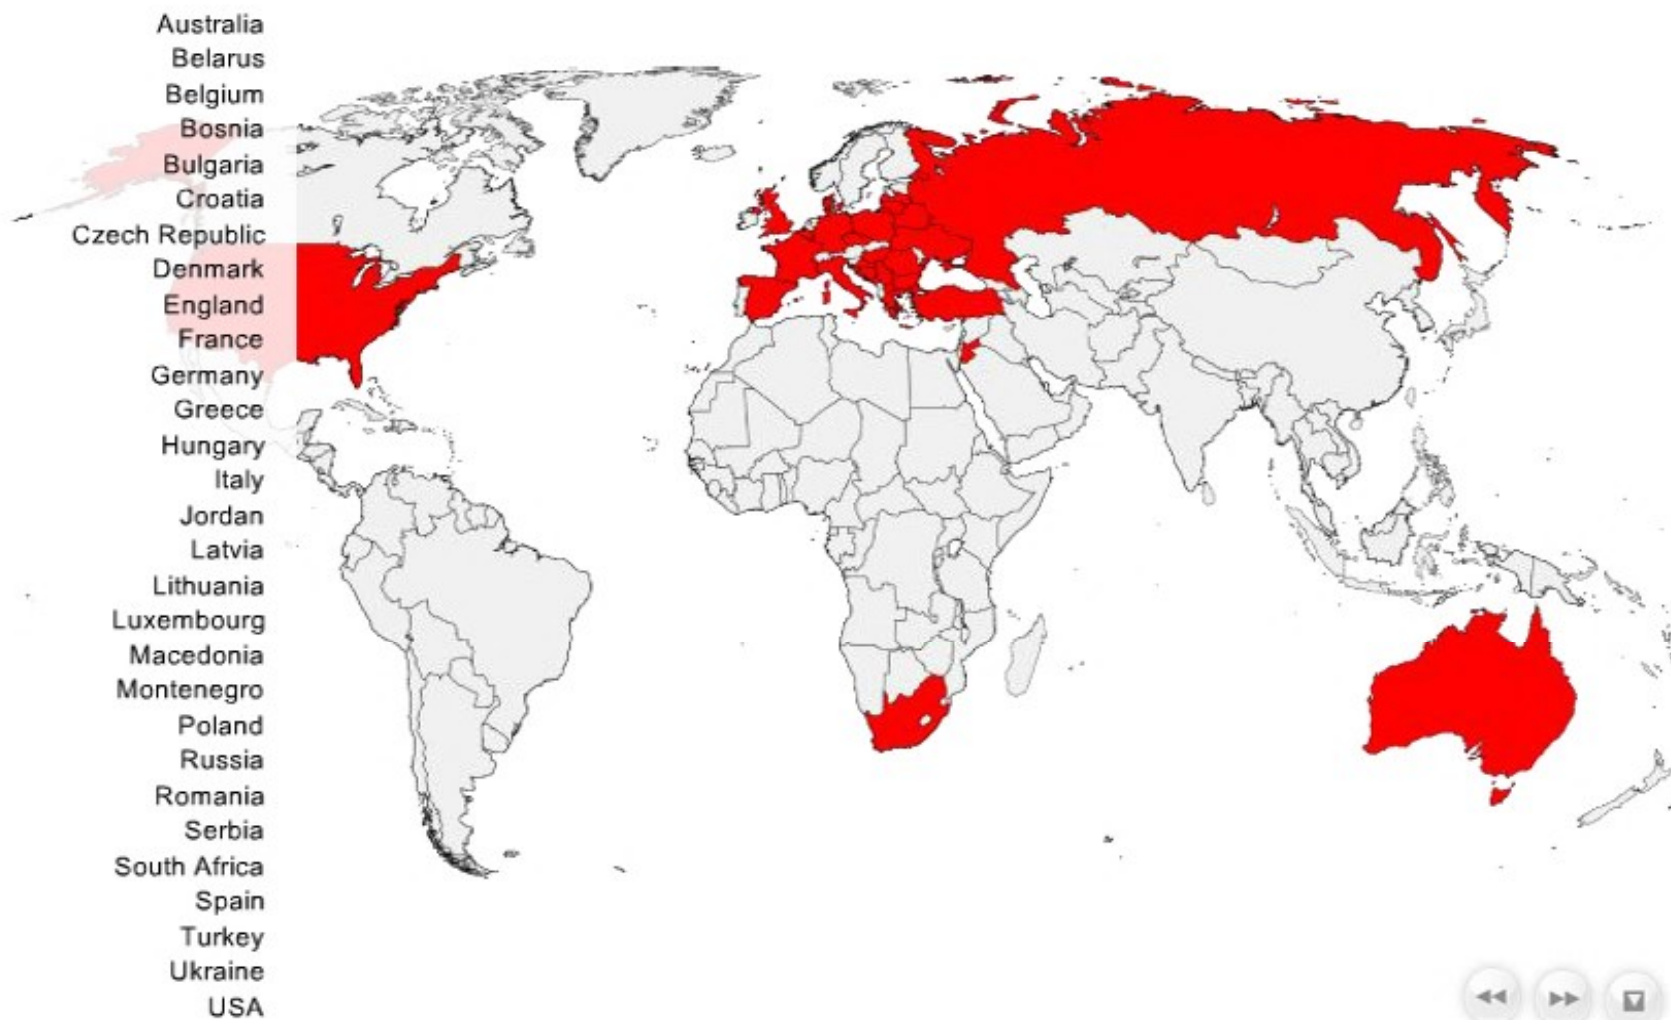

In 2020, the company's Management Board decided to implement the environmental management system.

QUALITY POLICY

LINEX Sp. z o.o.
Rejtana 15
42-202 Częstochowa
www.linex.com.pl

The Management Board of Linex Sp. z o.o., with its sense of responsibility for safety and functionality of offered products and its commitment to achieve customer satisfaction, establishes the following Quality Policy.

Quality Policy

The primary goal of our activity is the production of control cables that comply with legal regulations and meet our customers' requirements.

The most important measurement of our success is to determine how customers are satisfied with our products. For that reason, meeting customer needs and complying with legal requirements is our priority. It determines our business's market position in comparison to our competitors.

When implementing the provisions of the following Quality Policy our company agrees with concept of social responsible business.

Essential to our company are as follows:

- increasing customer satisfaction and the quality of our products,
- continuous improvement of the quality management system and its processes,
- management's attitude to ensure the effectiveness of the quality management system
- safety of our products and processes,
- development of technology and infrastructure,

ENVIRONMENTAL POLICY

LINEX Sp. z o.o.
Rejtana 15
42-202 Częstochowa
www.linex.com.pl

ENVIRONMENTAL POLICY

LINEX Sp. z o.o., as one of the Polish market leading manufacturers of automotive control cables, conduits and casings, undertakes actions related to the protection of the natural environment appropriate to the scale and possibilities of its impact on the environment.

We strengthen our success taking into account all the factors arising from the context of our activity considering the decisions made from the point of view of our customers, employees, suppliers and contractors, and other parties related to the activity of our organization.

We consider perfect implementation of business and quality processes as inviolable basis of market and economic success while meeting all applicable compliance requirements, directly and indirectly related to the reduction of negative effect on the environment.

Our environmental orientation aims to improve the environmental results. It is implemented through ongoing improvement methods of the Environmental Management System based on the requirements of the PN-EN ISO 14001: 2015 standard.

The effective functioning of the Environmental Management System enables us to reduce the negative impact of our production activity on the natural environment in the scope and area appropriate to the current technical and financial possibilities of the Company.

The foregoing objectives we achieve in accordance with the following:

- consideration of the environmental life cycle aspects at the stage of product implementation,
- continuous competence development, including the crew's skills to protect the natural environment,
- increase environmental awareness among employees, who work under the supervision,
- implementation and raising awareness of the environmental policy, goals and tasks as well as accepted standards of conduct at all levels of management and in all workplaces,
- implementation of modern technical and organizational solutions with a specific focus on the environmental impacts minimization,
- resource management and waste reduction sustainability,
- reduction, where possible, of all emissions to the atmosphere, including greenhouse gases,
- introduction of alternative energy sources, in particular, renewable ones,
- analysis and control of environmental impacts as part of the environmental management programs implementation.

The responsibility for the joint policy implementation is adequately shared between all employees, who are given tasks and rights, with full description and effective communication of all appropriate operational criteria.

Considering the Environmental Management System as an effective tool to implement our company's policy, I declare to provide facilities and resources, support, and personally commit to its implementation and continuation, what should guarantee to achieve set targets.
